What is a rubric? A rubric is a coherent set of criteria for student work that describes levels of performance quality. Sounds simple enough, right?

Unfortunately, rubrics are commonly misunderstood and misused. The good

Online Library Characteristics

news is that when rubrics are created and used correctly, they are strong tools that support and enhance classroom instruction and student learning. In this comprehensive guide, author Susan M. Brookhart identifies two essential

Online Library Characteristics

components of effective rubrics: (1) criteria that relate to the learning (not the "tasks") that students are being asked to demonstrate and (2) clear descriptions of performance across a continuum of quality. She

Online Library Characteristics

Outlines the difference between various kinds of rubrics (for example, general versus task-specific, and analytic versus holistic), explains when using each type of rubric is appropriate, and highlights examples from all

Brookhart

Online Library Characteristics

with rubrics as well as those who are not, this book is a complete resource for writing effective rubrics and for choosing wisely from among the many rubrics that are available on the Internet and from other sources. And it makes the case that rubrics,

Online Library Characteristics

when used appropriately, can improve outcomes by helping teachers teach and helping students learn.

ideas and encouragement to help teachers manage the conflicting pressures of teaching and become the educators they imagined. Teaching is an incredible profession, but it also comes with a potentially toxic

Online Library Characteristics

workload. You do not have to put up with burn-out, however and one way to avoid it is to return to how you imagined teaching to be in the first place. Before you became a teacher, you pictured yourself as a teacher; in your imagination you

Online Library Characteristics

almost certainly saw yourself as happy, efficient and able to manage your worklife balance effectively. Yet chances are that the reality of teaching is a little different, and it is this disconnect that can give rise to stress, anxiety and

frustration. But what if you could use simple strategies to get a handle on your schedule and take control of your workload? Covering lesson planning, behaviour management, the streamlining of marking and getting the best

out of CPD, Kevin Lister has drawn on his background in engineering to fill this book with trusted techniques and savvy suggestions to help you maximise your productivity and teach like you imagined it. Each chapter examines a different aspect

of the day-to-day reality of teaching and suggests alternative, practical ways to look at or approach common tasks. Throughout the book Kevin touches on topics such as time management, prioritisation, educational research,

leadership, psychology and other diverse concepts that his personal experiences and education have led him to explore. After each area of discussion there are prompts for action, where Kevin asks you to reflect on your working

This text introduces university students to the philosophical ethos of critical thinking, as well as to the essential skills required to practice it. The authors believe that Critical

Online Library Characteristics

Thinking should engage students with issues of broader philosophical interest while they develop their skills in reasoning and argumentation. The text is informed throughout by philosophical theory concerning

Online Library Characteristics

argument and communication—from Aristotle's recognition of the importance of evaluating argument in terms of its purpose to Habermas's developing of the concept of communicative rationality. The authors' treatment

Online Library Characteristics

of the topic is also sensitive to the importance of language and of situation in shaping arguments, and to the necessity in argument of some interplay between reason and emotion. Unlike many other texts in this area, then, Good Reasons for

Online Library Characteristics

Better Arguments helps to explain both why argument is important and how the social role of argument plays an important part in determining what counts as a good argument. If this text is distinctive in the extent to which it deals with the

Online Library Characteristics

theory and the values of critical thinking, it is also noteworthy for the thorough grounding it provides in the skills of deductive and inductive reasoning; the authors present the reader with useful tools for the interpretation,

Online Library Characteristics

evaluation and construction of arguments. A particular feature is the inclusion of a wide range of exercises, rich with examples that illuminate the practice of argument for the student. Many of the exercises are self testing, with

Online Library Characteristics

Answers provided at the back of the text; others are appropriate for in-class discussion and assignments. Challenging yet accessible, *Good Reasons for Better Arguments* brings a fresh perspective to an essential subject.

This text offers advice, guidance notes and support materials for tutors marking and grading essays.

The notes cover all the common issues on which students need guidance including argument construction, clear

writing and the conventions of quotation and presentation. They also deal with the problems of grading, making comments and offering guidance to tutors as they mark essay scripts. Two sample marked essays are included in the

of anyone doing research, since using the web to find high quality information is a key research skill. It introduces beginners and experts alike to the most effective techniques for searching the web, assessing and organising

information and using it in a range of scenarios from undergraduate essays and projects to PhD research. Nigel Ford shows how using the web poses opportunities and challenges that impact on student research at every level, and he explains the skills

Online Library Characteristics

needed to navigate the web and use it effectively to produce high quality work. Ford connects online skills to the research process. He helps readers to understand research questions and how to answer them by constructing
