This book presents a critical understanding of Indian business situated as an encounter between indigeneity and Western modernity by exploring notions and practices of responsibility. It brings the paradoxical nature of Indian businesses to the fore: though they have a rich history of philanthropic contributions to social causes, they have also been known for labour rights and human rights violations, environmental abuses, destruction of habitats, pollution and corruption. The book shows how Indian firms straddle these two starkly contrasting positions and the many blends in between to conform to global developments in the pursuit of corporate social responsibility (CSR). It also looks at the emergent field of critical studies and analysis of CSR, especially from the context of a developing country. Part of the 'Contemporary Themes in Business and Management' series, this book will interest scholars of international business studies, management studies, economics, post-colonial management, organisational studies and corporate social responsibility, as well as businesses, corporates and practitioners.

This book gathers selected research articles from the International Conference on Innovative Product Design and Intelligent Manufacturing System (ICIPDIMS 2019), held at the National Institute of Technology, Rourkela, India. The book discusses latest methods and advanced tools from different areas of design and manufacturing technology. The main topics covered include design methodologies, industry 4.0, smart manufacturing, and advances in robotics among others. The contents of this book are useful for academics as well as professionals working in industrial design, mechatronics, robotics, and automation.

This book analyzes contemporary issues relating to energy, environment, and globalization in the Indian context. As a signatory to the Paris climate accord, India has reiterated its commitment to taking strong and positive steps toward climate change mitigation. However, as one of the fastest growing economies in the world, it is battling the effects of a steep rise in fossil fuel usage and pollution. Further, increasing globalization is leading to greater economic activity and production, resulting in additional energy use, which has a negative effect on the environment. The book argues that globalization need not have only a negative environmental impact; it can also have positive impact through the importation of environmentally sound technologies and implementing global compliance standards. The book is divided into three sections: The energy section discusses issues relating to the status of Indian natural gas market and the need for developing an efficient gas market in India; the economics and politics of sustainable energy

in India; the challenges of thermal power and significance of clean thermal power generation in India; environmental and policy issues concerning energy use in urban India; the importance of energy use in developing Human Development Index (HDI); and issues relating to renewable energy in India. The environment section then examines topics such as the impact of global warming on local weather by examining the frequency of extreme weather events such as drought and floods, and their impact on farming activities in the Indian state of Odisha; the importance of according the economic value to environmentally significant things like national park, mangroves, etc. for sustainable development; the role of environmental accounting for ecological sustainability and ecotourism; and environmental concerns increasingly gaining traction among the corporate sector for their long-run benefits. Lastly, the third section addresses issues relating to the challenges and opportunities of globalization, such as the interface between globalization and environment; managing India's business interest in proposing new Bilateral Investment Treaty (BIT); the challenges being faced by Indian exports and their revival; and making Indian SMEs competitive. As such, it is an invaluable resource for policymakers, researchers, practitioners and students in the field of energy, environment and trade economics.

This fully revised and updated third edition carries a holistic approach to the new and emerging realities of Indian as well as the global business environment. It incorporates the new challenges emanating from Covid-19 outbreak and also other enablers shaping up the business environment. This new edition brings forth a contemporary and pragmatic appeal to the learners. The text provides an incisive insight into the subject via simple, elegant and explicit presentation that amalgamates theory logically and rigorously with the practical aspects. Organised in 24 chapters, the book aims to develop a broader understanding of the concepts and their applications and dexterously assimilates the latest statistics depicting the national and global perspectives. This text is suitable for both PG and UG students of Management, Commerce, Economics, and Business Studies. Besides, it is of immense value to the aspirants of civil services and the professionals, including policy makers, working in the government departments. **NEW TO THE THIRD EDITION** • Presents latest developments viz. The new OECD SME and Entrepreneurship Outlook presents the latest trends in performance of small and medium-sized enterprises (SMEs) and provides a comprehensive overview of business conditions and policy frameworks for SMEs and entrepreneurs. This year's edition provides comparative evidence on business dynamism, productivity growth, wage gaps and export trends by firm size across OECD countries and emerging economies.

A multidimensional approach to entrepreneurship, especially in the post-COVID-19 era, will have an important influence on the state of business and government, especially when considering the effects of technological development, innovation, glocalization, and nationalization policies that need to be adopted for inclusive sustainable growth, as well as the enhanced and efficient utilization of global resources. That means there is likely to be a shift in how entrepreneurship development and entrepreneurial opportunities will be perceived, developed, and resourced. The question is how to sustain SMEs and entrepreneurial innovation in the post-COVID-19 era. Thus, comprehensive research and knowledge on designing policies and approaches to ensure the sustainability of SMEs and entrepreneurial innovation in post-pandemic times are essential to sustain, stimulate, and foster SMEs, entrepreneurship, and entrepreneurial innovations. The Handbook of Research on Sustaining SMEs and Entrepreneurial Innovation in the Post-COVID-19 Era provides research dedicated to entrepreneurship with a special emphasis on the sustainability of SMEs and entrepreneurial innovations in the post-COVID-19 era. It provides discussion and the exchange of information on principles, strategies, models, techniques, methodologies, and applications of entrepreneurship in the post-COVID-19 era in the field of public and private organizations. The chapters communicate the latest developments and thinking on the entrepreneurship subject worldwide by drawing on the latest developments, ideas, research, and best practice to examine the implications of the changes taking place due to COVID-19. This book is ideally intended for entrepreneurs, global organizations, small and medium-sized enterprises, managers, executives, government officials, policymakers, researchers, academicians, and students who are interested in learning about, designing, or implementing policies that are more effective in the post-pandemic era.

Somaliland's Private Sector at a Crossroads is the World Bank Group's first effort to undertake a consultative in-depth analysis of the private and financial sector in Somaliland in at least a generation. The objective of the report is to take stock of what has been achieved since the 1999 constitution was approved, provide an assessment of the current evolution of the private sector, and identify some priority policy options and related actions that would best enable the private sector to generate the growth and jobs sought under the Somaliland National Development Plan. The report is structured around the three key sector 'actors' of the economy: enterprises, financial institutions, and the government. This approach has been taken to facilitate a 'political economy' lens into the analysis. The report explores trends in, opportunities for, and impediments to effective government regulation of the private and financial sector and private sector-led economic growth in Somaliland, a relatively new democracy with limited institutional capacities. Drawing heavily on feedback received through an extensive consultative process that was undertaken in tandem with the analysis, the study concludes with recommendations for policy choices for the continued robust growth of the private sector and the evolution of a sounder financial sector.

The 9th edition of the Scoreboard on Financing SMEs and Entrepreneurs report provides data from 48 countries around the world on SME lending, alternative finance instruments and financing conditions, as well as information on policy initiatives to improve SME access to finance.
